SOC 4650/5650: Lab-10 - Adding the 1830 Census Maps to a StoryMap

Christopher Prener, Ph.D.

Spring 2021

Directions

Using data accessed from the `module-4-arcgis-online` repository and the maps you created for Lab-09, continue to build out your experimental ArcGIS StoryMap. A link to your StoryMap should be added to an issue in your GitHub assignments repository by **Monday, April 12th** at 4:15pm. Make sure it is published so that Chris can view it!

Part 1: Building out the StoryMap

In Lab-09, you created a map showing the location of Missouri in 1830 as well as a map showing the state and territory populations as of the 1830 Decennial Census. Add both of these to your map document under a new heading with a paragraph of placeholder text. You should use either the Slideshow or Sidecar tool for adding these maps. This entire section of content should be located under the "Comparing Changes" section we created during class.
